

Neha Agrawal

neha@iitg.ernet.in

Room No. 214 Subansiri Hostel, IIT Guwahati-781039, Assam (+919864915684)(**Present**)

nehaagr31@gmail.com

34, Ramchandra Nagar (Ext.) , Indore- 452005,M.P. (+91 7312410559)(**Permanent**)

Objective

To acquire a challenging position of software professional where I can contribute my technical skills and abilities towards the growth of the organization.

Academic Qualification

Final year, M.Tech, Computer Science and Engineering (Expected Graduation – May 2008) IIT Guwahati

C.P.I. - 8.20 (in 2 semesters)

GATE (AIR) 283

R.G.P.V. -B.E.(CSE) 70%

M.P. Board. - XIIth 68.2%

M.P. Board. - Xth 71%

Professional proficiency

Languages C/C++, core java, HTML, J2EE

Platforms Windows 98, 2000, XP, Linux.

Awards

- Gold medal in intra college Cricket Match in 2003-2004

-Runner up in intra college Volleyball Match in 2006

Extra-Curricular Activities

- Represented IIT Guwahati in SPIRIT '06 as a member of its Basketball Team.

- Participated in the Inter-hostel Cultural festival of IIT Guwahati, MANTHAN 2006.

Projects

(i) Horticulture Department Management System (Live Project) (B.E. Minor project)

Tools Used: Corejava (front end) , Oracle(back end)

Description: User friendly software for organization N.H.R.D.F to maintain and regularly update their database related to marketing information, area and production of different vegetable crops so as to generate the reports as per their requirements

(ii) Online Help Desk (B.E. Final yr)

Tools Used: JSP, Sevlets , RationalRose, Oracle

Description: Intranet application to automate the workflow of service requests. Its common features are message board, polling and notice board.

(iii) Resource Selection in Mobile Grid Computing (M.Tech Thesis)

With the emergence of Grid as a suitable hosting technology for the application in various areas including data and computing intensive computing, online gaming, it is becoming important to make better usage of computing power and storage capabilities of mobile devices also. However, extending grid infrastructure in mobile devices provides new challenges. As resource management is critical aspect for performance of mobile grid system that declares the efficiency of the whole system

Our resource selection involves a set of factors, such as application minimal requirements, application run time, mobility behavior and resource access policies. In addition, resource selection must consider uncertainties associated with each resource and answer questions related to resource reliability to access a resource

Conferences Attended

- ICDCN-2006 held at IIT Guwahati
- Introduction to Red Hat® Workshop at IIT Guwahati in 2006

Term Projects

Title	Advisor	Duration
Seminar on Communication Algorithm in high mobile Network	Dr. S.V.Rao	Aug – Nov '06
Term Project in Distributed System	Dr. Diganta Goswami	Aug – Nov '06
Micropayment System (Term paper in Network security)	Dr. Sukumar Nandi	Feb – Mar '07
Project in Mobile Robotics named as Car Follower	Dr. S.B. Nair	Jan – Apr '07

Personal Information

Birth date: 26th Feb. 1984
Hobbies and Interests: Sketching, Playing, Cooking
