Projects Undertaken:

1. B.Tech: Enhanced Two Level Recovery Schemes

My B.Tech Project is in distributed systems. I have concentrated mainly on checkpointing related issues. I have designed a enhanced checkpointing and recovery scheme which makes use of both diskless and diskbased checkpointing efficiently and recovery of the system is also designed. I have added to it, in my M.Tech course, Distributed system, the Log based Rollback Recovery using partial message logging.

2. M.Tech: All Pair Shortest Path Problems

My M.Tech project is about All Pair Shortest Path Problems (APSP). This is a very classical problem where solution is proposed in 1960 in $O(n^3)$. The complexity of this problem is yet remained open till today. I am fine tuning the Floyd-Warshall algorithm and in parallel working for a new APSP algorithm. I am able to achieve one, but the complexity of the algorithm is not yet improved.
