

Resumé

Personal Information

Name : Narasimha Naidu Karumanchi

Address : S/O Modaiah Karumanchi,
Durgi(Post and Mandal),
Andhra Pradesh. 522612
INDIA.

Phone Number : 91 - 9819537565

E-mail Address : narasimha@cse.iitb.ac.in

Sex : Male

Marital status : Single

Nationality : Indian

Date of Birth : Feb 10, 1982

Place of Birth : Macherla, Andhra Pradesh, India.

Admission Desired in : Fall 2004

Degree Sought : M-Tech

Major : Computer Science.

Academic Record

Educational Status : Final Year of Master of Technology Program
Department of Computer Science & Engineering
Indian Institute of Technology, Bombay

Present CPI
(equivalent of GPA) : 8.42 on a scale of 10(with project)

School/University	Degree/ Certificate	Date of award	% Marks/ GPA
Indian Institute of Technology Bombay	Master of Technology	July 2005	8.42/10(with project)
Nagarjuna Institute of Technology N.I.T.S, Miryalaguda	Bachelor of Technology	Apr 2003	80%
Andhra Pradesh State Board	(Class XII)	Apr 1999	86.7%
Andhra Pradesh Secondary Education	(Class X)	Apr 1997	73%

Academic Honors

- I was ranked **63rd** among approximately 40,000 examinees in **GATE-2004**, the examination for admission to the IITs.
- I was ranked **2506th** among approximately 1,20,000 examinees in **EAMCET-1999**, the engineering entrance examination conducted by Andhra Pradesh Government, India.
- Won **5th** prize in technical quiz competition conducted by **BPS(Bhashyam Public School)** at district level in 1997.

Projects Undertaken

- **M.Tech. Project:**

Project Title : **Design and Implementation of Dynamic VS Routing in Linux Kernel**

Guides : **Prof. Girish P. Saraph and Prof. M. R. Bhujade**

Project Synopsis: The performance of a high speed router is limited by factors such as IP table look up in large routing table, memory bandwidth, memory size and the backbone switch. The main goal of this project is to implement VS routing algorithm in Linux kernel which avoids these problems by following a routing mechanism different from conventional IP routing called VS routing.

- **Database Management Systems:** Implementation of buffer manager for RDBMS.
- **Network Security:** Fine Grained Authorization in Database Systems. In this I have studied about ORACLE VPDs, Multilevel Secure Models and RBAC[Role Based Access Control] mechanism for database security at attribute level.
- **Hardware Description Languages Project:** Implementation of VS Routing algorithm in both Verilog and VHDL.
- **MPLS[Multi Protocol Label Switching Protocol:]** The objective of this project is to setup a RSVP-TE MPLS network and comparing results in normal OSPF network and MPLS based network.
- **Compiler Project:** This project aims at finding the bugs in Tiny OS.
- **Mobile Computing:** A Web-service Application for Policy Seekers Connected through Mobile Devices. The aim of this project is to build a system which will help insurance agents to service its clients effectively. Clients connect to the web Service provided by the agent through J2ME mobile phones

and fills the required information like name, age, salary etc. Then this system will help the users by suggesting them the policies which suits them the best. In this I learnt about J2ME, XML, Web-services etc.

- **Course management System Project:** Creating a system for automation of course activities at IIT Bombay.
- **B.Tech. Project**

Project Title	:	Data Compression
Guide	:	Prof. Rama Krishna Dondapati
Software Used	:	C++
Operating System	:	Windows-95
Team Size	:	2
Duration	:	30 Days

Project Synopsis: This project is based on the compression of words using Huffman compression algorithm. The basic idea is that, Huffman compression algorithm ensures that words which occurs more number of times take less number of bits and the words which occurs less number of times takes more number of bits. As a result we can compress the data with less storage space in memory and takes small amount of time for sending the same data on the communication lines.

Seminar Information

- **M-Tech Seminar**
 - **Title: Compiled Code Verification**
 - **Guide: Prof. A. Sanyal**
- **B-Tech Seminar**
 - **Title: Memory Management in Operating Systems**
 - **Guide: Asst. Prof. J. Shanker**

Software Exposure

- I am well conversant with the following programming languages: **C, C++, Java, PERL, Verilog, VHDL and 8085 assembly language.**
- I have worked extensively on, and am well conversant with the following platforms: **DOS, UNIX and Linux.** I am also quite comfortable with **Windows NT and Windows 95.**
- Internet technologies: **HTML, PHP, Java Servlets, J2ME and XML**

- Packages: **Latex**, **awk**, **office** etc.
- Tools: **OPNET**, **Qualnet**, **NS-2**, **Xilinx**, **ModelSim**, **ModelTech** etc.

Extra Curricular Activities

- I am currently the **Web Secretary** of
 - SecNet, The main purpose is to promote discussions of research and relevant activities in security-related subjects. It also aims at increasing the synergy between academic and industry professionals working in this area.
 - TELCA, the largest regional cultural function being organized at IIT Bombay.
- Won **first** prize in slow cycling competition.
- Won **3rd** prize in district level Volley Ball competition.

Declaration

I hereby declare that the information given above is true to the best of my knowledge.

(Narasimha Naidu Karumanchi)
