
Objective

To acquire a challenging position in a professional organization and to benefit the organization by being a useful resource and an able team player.

Education

Standard	Univesity/Board	Year	CPI/Percentage
Mtech(CS)	IIT Guwahati	2008	9.1(till 2 nd sem)
B.E. hons (Computer Science and Engg.)	RGPV Bhopal	2006	73%
Higher Secondary Exam (XII)	M P Board	2002	71%
High School Exam(X)	MP Board	2000	70%

Skills

Programming Languages	C, C++, Java, lejos, J2ME
Operating System	DOS, Windows, Linux
Major Courses	Algorithms, Wireless Networks, Wireless Sensor Networks, Network Security, Operating System, Database Management System

Mtech Projects**1. Routing in Wireless Sensor Network**

In this project we have taken a special class of sensors in which the sensing range of sensor devices is much higher than the communication range. The sensors used can be very expensive so we have tried to fit the problem in another model and we are trying to come up with a new protocol to use the resources more efficiently using wireless sensor and actor networks.

Our solution can be useful to the areas like detection and disaster management of earthquake, volcano or forest fire etc

2. Drawing and Capturing in Robot RCX 2.0 Lego kit

In this project we have developed a code for RCX 2.0 lego robotic kit which solves following purposes

1. Drawing rough sketch of the figure we have drawn on computer screen using a mouse
2. Captures the figure the robot moves following a black path and this path is then drawn back on the computer screen.

B. E. Projects**1. Traffic warehousing**

It was a system which was similar to the one prevalent in BHEL. In this we used java as a front-end to generate reports and oracle was used as a backend to fetch data from the database. Whenever a new order arrives in BHEL this system would help in maintaining the different reports for every dept like manufacturing, delivery etc right from the time of arrival. This would help in getting the order delivered in the scheduled time and if at all any delay occurs it could be easily verified due to which dept it occurred.

2. Mail Retrieval in mobile devices using POP3 protocol

In this project we have developed software for mobile device which can be used to retrieve mails from the mail server which uses POP3 protocol. We have used J2ME for coding.

Trainings

1. Major Industrial Training

Organisation Bharat Sanchar Nigam Limited. ITARSI
Description: The training was conducted at the Computer Section of BSNL Itarsi and aimed at covering the technical concepts of Mobile and Broadband Communication. The duration of the training was 4 weeks.

2. Short-Term Training on various network devices

Organisation Smriti Netcom. Bhopal.
Description: The objective of this training was to extend the knowledge about various network devices like routers, gateways etc and be familiar with the technical aspects of working of these devices.

Personal Achievements and extra curricular activities

- Scored 519 score in GATE 2006
- Participated in various plays at school level
- Participated in various cricket tournaments representing school and college team.
- Participated in various poetry competitions in college.

Personal Details

Nationality Indian
Marital Status Unmarried
Languages known English, Hindi, Marathi.
Hobbies Reading, Poetry, Playing Cricket.
Preference for location Ready to relocate to meet objective
Strengths Good Team player, Adaptable in any environment, quick to grasp new concepts.
