

G S SATYA PRAKASH

H.NO 6-3-264,

SBH Colony,

Khammam , Khammam Dist,

Pin: 507002.

Mail id: gssatyaprakash@iitg.ernet.in**Phone no: 08742-222114(R) 91-9954249339(M)**

Career Objective:

To strive towards continuous improvement of my knowledge and skills, which will help me grow along with the company, I work for. I'm eager to take on tough assignments involving research and quantitative analysis in the field of computers.

Educational Qualifications:

Examination	Discipline/ Specialization	School/ College	Board/ University	Year of Passing	%/cpi
M.Tech	Computer Science Engineering	IIT Guwahati	IIT Guwahati	2008	9.32 (up to 2nd sem)
B.Tech	Computer Science and Information Technology	Sreenidhi Institute of Science And Technology, Hyderabad.	J.N.T.U	2006	73.99
10+2	Maths+Physics+ Chemistry	Suryodaya Jr College, Khammam.	Board of Intermediate Education A.P.	2002	96.3
S. S. C	S.S.C	Gorkey High School, Khammam.	Board of Secondary Education.	2000	85.1

M.Tech Project:

Project title:

Spam Mail Management

Project outline:

Spam was always been conceived as a problem with a permanent solution by the researchers but it hasn't been eradicated till today. As new filters entered the market, spammers have found ways to evade them. Even sophisticated filters like Bayesian Filters were proved inefficient since their deployment. As new areas of research are opening in this adversarial information processing, we try to focus on approaches which can be added on the top of any filter. One such approach which we have suggested is to take input from the user to intelligently combine it with an existing approach. In addition to making better decisions the approach doesn't get outdated. In another idea we propose a variation of Naïve Bayes Filter. Instead of applying the Bayes Rule on the whole message to classify it as spam mail or legitimate mail, we would apply the rule on blocks of message called segments and make a decision. It is based on a simple notion – human reader posed with a message from new ids would normally search for interesting blocks in the message (which convey the message in short). Based on their relevance they decide whether to read or discard.

B.Tech Project:

Project title:

Augmentation of Staffing Workflow

Project outline:

The aim of the project is to automate the staffing process in a company and to generate some intelligent reports that help the company in their business. The company's business is to acquire consultants and float them to the software clients as per their requirements. Clients consult the company's salesperson for resources through their authorized personnel. The Client requirements are fetched and then are used to search for eligible candidate resumes. If the Salesperson fails to find required number of resources in his company he alerts the Recruiter of the company. His job is limited to adding new resources to the company. From among the available resources the candidate resumes are forwarded to the client for further interviews. The Salesperson collects the status of the resumes forwarded to the client so as to track his employees' status. While running the business the salesperson has to conform to business rules which may state - "Not to hire an employee to 2 companies at a time".

Reports add as an important service in the long run to the business. Information collectively gathered over months, years are analyzed carefully to draw interesting conclusions. One of which can be –A consultant failing at client interviews repeatedly may need training.

Computer Skills:

Languages : C,
Web Programming : HTML, XUL, JAVA SCRIPT.
Operating Systems : Windows 9x/2000/XP, MS-DOS

Achievements:

- Secured **All India 366th Rank** in **GATE 2006**.
- I was awarded the “**Prathibha Award**” by Govt. of A.P. for my performance in Intermediate.

Personal Profile:

Name : Satya Prakash G S
Father's Name : G. Upendar Rao
Sex : Male
Marital Status : Unmarried
Nationality : Indian
Hobbies : Listening to Music, Playing Cricket
Date of Birth : 09-07-1985

(G. S. SATYA PRAKASH)
