

RESUME

NAME: Venkata Praveen Borra

M.Tech Final Year

Department of Computer Science & Engineering,
Indian Institute of Technology Guwahati.

EMAIL: b.v.praveen.cs@gmail.com

v.borra@iitg.ernet.in

PRESENT ADDRESS:

Room No. C1-103, Kameng Hostel,
IIT Guwahati, Assam-781039.
Contact No.+ 91 9864630461

PERMANENT ADDRESS:

Door No. 9/666, Balaramunipeta,
MachiliPatnam, Andhra Pradesh-521001.
Phone: 08672-223284

CAREER OBJECTIVE

Looking forward to work in an organization possessing knowledge based environment and engaged in developing software products reaching millions of people across the globe.

EDUCATION

S.No	Qualification	Name of the Institution /University	Year of study	Percentage/CPI
1.	M. Tech C.S.E	Indian Institute of Technology Guwahati	Pursuing	8.88
2.	B. Tech C.S.E	Gudlavalleru engineering college/ JNTU	2002 – 2006	76.63%
3.	Intermediate	Nalanda Junior College	2000 – 2002	90.9%
4.	S.S.C	S. V. Public School (C.B.S.E)	1999-2000	74%

SOFTWARE EXPOSURE

Programming Languages : C, Java (core Java, Servlets, JDBC, Java Mail), Java Script, PL/SQL
Platforms : Windows, Unix, Linux
Applications : Oracle8i, MS Office, Latex

AREAS OF INTEREST

Databases, Operating Systems, Question Answering Systems

PROJECT EXPERIENCE

MAJOR PROJECTS

1. **Answering Questions beyond Factoid on the Web (ongoing M.Tech thesis)**

Contemporary information retrieval systems (search engines) present users with lot of documents in response to a query, while in most cases users search for information and not documents. Also users have problems in formulating the information needs. This demands for efficient IR systems which would overcome these limitations, thereby reducing the users extra work in retrieving the necessary information. A step towards that goal is Question Answering Systems which would provide users

with succinct answers to the questions posed in natural language. Success of the existing QA systems on web is limited to answering the factoid questions. Our work concentrates on answering questions beyond factoid on the web, based on the idea of semantic passage segmentation.

2. **A Region Based Image Retrieval Using Metric Similarity Measure (B.Tech Project)**

Content Based Image Retrieval (CBIR) is a method of retrieving images based on the visual cues such as color, shape, texture. In this project, we have developed a CBIR system using k-means segmentation, Integrated Region Matching (IRM) and Minimum Cost Region Matching (MICROM) similarity measures, and HF-indexing algorithm. We concluded that performance of system can be enhanced by making IRM to yield metric distance which in turn reduces the number of images to be compared at run time.

MINI PROJECTS AND TERM PAPERS

1. **GUI Developer:** Eases the development of GUI in Java, by automating code generation.
2. **reGoogle Implementation:** An offline search strategy to conserve organization's bandwidth.
3. **Armstrong Tool:** Creates good relational database design using the concepts of normalization.
4. **Intranet Mailing System:** Developed using Java as term project during under-graduation.
5. **Question Answering System on e-books:** This software facilitates retrieval of answers from e-books which are a major source of information in today's PCs. A new way of indexing books has been ideated.
6. **Implementation of Image Processing Algorithms:** Implemented edge detection, histogram equalization, and average filtering techniques in Java.
7. **Code Obfuscation:** Making the code difficult to understand or reverse engineer, by applying some transformations. Term paper submitted as part of Computer and Network Security Course.
8. **Cross-Layer Optimization for Wireless Sensor Networks:** Energy efficiency of wireless sensor networks can be improved by tuning behavior of a layer based on other layers. This is a term paper submitted as part of Wireless Sensor Networks course.

ACHIEVEMENTS

- Best outgoing student from C.S.E Department, Gudlavalleru Engineering College (GEC)-2006.
- Secured All India Rank of 264 out of 22,323 students in GATE-2006.
- Awarded third prize in "Open Software" contest for the software entitled "Software Development Tools" conducted at Techniche'06, IIT Guwahati.
- Awarded first prize in "Software Contest" for "Armstrong Tool" on the eve of 8th College day celebrations and first prize in "Software Contest" for "GUI Developer" on the Occasion of 7th College day celebrations at GEC.
- Achieved first prize in "Challenge C" conducted on the eve of 2nd anniversary celebration of COMITY on 28th February 2004 at GEC.
- Achieved first prize in "Software contest" conducted on the eve of 3rd anniversary celebration of COMITY on 17th February 2005 at GEC.
- Awarded second prize in implementation of Image Processing Algorithms at GEC.
- Got prizes in singing and dancing on the eve of college and department day celebrations at GEC.
